

Nedgroup Investments XS Select Equity Fund of Funds

Class A

March 2019

XS SELECT RANGE

RISK RATING

Risk reward profile

Equity and property investments are volatile by nature and subject to potential capital loss. For credit and income instruments, while unlikely, capital loss may also occur due to an event like the default of an issuer. The portfolio may be subject to currency fluctuations due to its international exposure.

Portfolio profile

The investment objective of the XS Select Equity Fund of Funds is to seek to secure, in real terms, the steady growth of capital. The portfolio is suitable for investors seeking exposure to the domestic and foreign equity markets with capital appreciation as the primary goal over the long term. The solution achieves its objective through investment in a diversified combination of four South African equity funds in equal weights.

¹ The annualized total return is the average return earned by an investment each year over a given time period. Performance is calculated for the portfolio and individual investment performance may differ as a result of initial fees, the actual investment, the actual investment date, the date of reinvestment and dividend withholding tax. Due to the delayed release of inflation data, relevant benchmarks will lag by one month.

² Total Expense Ratio (TER), expressed as a percentage of the Fund, relates to expenses incurred in the administration of the Fund. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TERs. Transaction Costs (TC), expressed as a percentage of the Fund, relate to the costs incurred in buying and selling the underlying assets of the Fund. TC are a necessary cost in administering the fund and impact fund returns. It should not be considered in isolation as returns may be impacted by other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER. The Total Investment Charges expressed as a percentage of the Fund, relates to all investment costs of the Fund. Both the TER and TC of the Fund are calculated on an annualised basis, beginning 01/01/2016 and ending 31/12/2018.

Portfolio attributes

The XS Select Fund of Funds range consists of simple, low-cost investment solutions that offer broad diversification across asset classes, fund managers and investment strategies, which can easily be incorporated into a financial planning process. Each solution is equally weighted across five fund managers. Rebalancing, back to the target weights of 20% per fund, takes place on a quarterly basis. Importantly, no performance fees are charged.

60% is invested in actively managed South African equity funds that are only allowed to invest in shares listed on the domestic stock exchange.

40% is invested in actively managed South African equity funds that are allowed to invest up to 30% in shares listed on stock exchanges outside of South Africa.

Each of these fund managers have their own unique style and full discretion on stock selection. We believe as a combined solution these funds will most consistently achieve the XS Select Equity objective of SA Inflation + 6.5% over a rolling 7-year period, with the added benefit of lower volatility.

Allan Gray was introduced at 10% on the 1st of October 2018. Its weight will be increased by 2.5% every quarter until the above model portfolio is achieved on 1 October 2019.

Investment manager

Nedgroup Investments Multi-Manager is a dedicated asset management division within Nedgroup Investments that consists of a diverse team of investment professionals based in Cape Town and London. We specialise in asset allocation and fund manager research and base our investment decisions on fundamentally-driven research.

Investment philosophy

We follow a long-term, valuation driven investment approach. Our investment philosophy is anchored to the following ten principles:

1. Long term investing, well considered.
2. Compounding is a powerful force.
3. Asset allocation is an important driver of returns.
4. Diversification has benefits.
5. Risks need to be properly understood.
6. The price you pay (valuation) is an important determinant of future returns.
7. Emotions can erode the value of rational decision making.
8. Costs are important.
9. Forecasting is difficult, assumptions need to be carefully considered.
10. Sound stewardship principles will improve odds of clients meeting their goals.

Who we are

Nedgroup Collective Investments (RF) Proprietary Limited, is the company that is authorised in terms of the Collective Investment Schemes Control Act to administer the Nedgroup Investments unit trust funds. It is a member of the Association of Savings & Investment South Africa (ASISA).

Our Trustee
