## Domestic performance drivers

### HIGHLIGHTS

- Ramaphosa revealed a fiscal stimulus plan to reinvigorate the sluggish economy through structural reforms, with the help of a R400bn infrastructure fund and partnering with the private sector and development agencies;
- The Reserve Bank kept interest rates unchanged at 6.5%, mainly due to inflation which slowed to 4.9% in August;
- The long-awaited Mining Charter was finally gazetted in September and has been widely welcomed.

### LOW POINTS

- GDP contracted a revised 2.6% for the 1st quarter and a further 0.7% in the 2nd quarter, indicating that SA has entered a recession for the first time since the global financial crisis;
- Continued local and global uncertainty led to further weakening of the Rand;
- The equity market suffered due to poor sentiment towards emerging markets.

## Global performance drivers

### HIGHLIGHTS

- Financial market volatility remained relatively low, whilst risk assets performed positively when viewed from the perspective of a global investor;
- World growth and corporate earnings data continued to impress, although it remains quite dependent on the US;
- The success of the NAFTA 2.0 talks, or the U.S.M.C.A talks as they are now called, was taken well by markets (these are the trade agreements between the US, Mexico and Canada).

### LOW POINTS

- Trump continued to escalate the US's trade war with China, while also picking a fight with Turkey by imposing punitive sanctions;
- Italy spooked investors when its new populist anti-EU coalition government announced a draft budget that would increase the country's debt burden;
- The long running and seemingly intractable Brexit saga rolled on with no obvious sign of any real progress on the crunch issues between the UK and the European Union.
