

INTERNATIONAL RANGE

RISK RATING

Equity and property investments are volatile by nature and subject to potential capital loss. For credit and income instruments, while unlikely, capital loss may also occur due to an event like the default of an issuer. The portfolio may be subject to currency fluctuations due to its international exposure.

FUND OBJECTIVE

The Growth MultiFund aims to provide high levels of growth with moderate to high levels of risk and volatility over the medium to longer-term.

It is anticipated that the Growth MultiFund will achieve a return of 3-month LIBID + 3% to 5% in the currency of the relevant share class over a rolling 5 to 7 year period.

To achieve the investment objective, the portfolio invests across a range of asset classes within a strategic and tactical asset allocation framework designed to maximise diversification benefits. An absolute and relative valuation-based approach underpins this framework, resulting in a multilayered process to facilitate disciplined decision-making and risk management.

The Growth MultiFund is suitable for clients with an investment time horizon of 5 to 7 years. Investing in the fund involves a risk to capital in order to achieve the desired return.

Lowest monthly return	-7.8%	-7.8%

PORTFOLIO STRUCTURE

* Class A includes a trail fee of 0.75%
Class B includes a trail fee of 0.50%

1) The annualised total return is the average return earned by an investment each year over a given time period. Performance is calculated for the portfolio and individual investment performance may differ as a result of initial fees, the actual investment, the actual investment date, the date of any reinvestment and dividend withholding tax. Data source Nedgroup Investments (IOM) Limited.

2) The on-going fee is a measure of the actual expenses incurred in the management of the Classes of the Sub-Fund. The on-going fee shown is expressed as a percentage of the monthly average value of the portfolio calculated over a 12-month period as at the date shown. The current on-going fee cannot be used as an indication of future on-going fees. A higher on-going fee does not necessarily imply a poor return, nor does a low on-going fee imply a good return.

INVESTMENT MANAGER COMMENTARY

MARKET COMMENTARY

Nedgroup Investments (IOM) Ltd
Investment Manager and Distributor

After an awful May, markets bounced back powerfully in June as the Federal Reserve signalled a shift towards a much more dovish stance. Whilst economic data was uninspiring, the sharp lowering of interest rate expectations powered all asset classes higher. Towards the end of the month, investor hopes were also raised ahead of Trump's meeting with Xi at the G20 summit, with suggestions that the two leaders might be able to reinvigorate the stalled US-China trade talks. In Europe, UK politics saw arch-Brexiteer Boris Johnson take an almost unassailable lead in the race to become the next Prime Minister. Finally, in the Middle East, tensions were stoked by the sabotaging of two oil tankers in the Gulf of Oman, an act that the US accused Iran of committing. The tanker attack, along with a sharp fall in US oil inventories and suggestions that OPEC would cut production saw the price of oil rise sharply over the month.

Equities rebounded strongly with the MSCI AC World Index rising +6.5% in US dollars. Dispersion was relatively low, with returns for most major markets lying between +5 to +7%. The area of greatest strength was Europe ex UK (+7.4%), whilst Japan (+3.7%) was the biggest laggard. At the sector level, cyclicals performed the best, whilst defensives and interest rate sensitives trailed. Materials (+9.9%), Information Technology (+8.6%) and Consumer Discretionary (+8.1%) led the way, whilst Real Estate (+2.6%), Utilities (+4.0%) and Consumer Staples (+4.3%) brought up the rear. In terms of style, Growth (+7.0%) continued to outpace Value (+6.2%), whilst Larger Companies (+6.5%) had the edge on Smaller Companies (+5.7%).

Fixed income markets also rewarded investors, with most areas delivering strong returns. Whilst the biggest profits were seen in the riskier and more esoteric areas, even government bonds managed to deliver outsized gains, which is unusual in periods when risk assets do so well. This can be partly explained by the fact that falling interest rate expectations were an important factor driving all asset classes. Over the month, the JP Morgan Global Government Bond Index posted a return of +1.4%, whilst the ICE Merrill Lynch Global Corporate Investment Grade Index gained +2.0%, the ICE Merrill Lynch Global High Yield Index rose +2.4% and the JP Morgan Global Emerging Market Bond Index advanced +3.0% (all hedged to US dollars).

Commodities were also on a much firmer footing, with the Bloomberg Commodities Index gaining +2.7%. Again, the pattern was unconventional, as safe haven Gold (+8.0%) vied with Crude Oil (+8.8%) for leadership across the asset class. In other areas, Industrial Metals (+2.0%) and Agriculture (+0.5%) were also up, albeit more modestly.

With the Federal Reserve turning significantly more dovish over June, the main theme for foreign exchange markets was the weaker US dollar, which came under pressure against most currencies. Whilst the dollar fell by -1.8% against the euro, its biggest falls came against emerging market and commodity relative currencies, such as the Canadian dollar (-3.1%), South African rand (-3.4%), Argentine peso (-5.3%) and Mexican peso (-2.4%).

(Notes: All monthly data is quoted in US dollar terms unless otherwise stated).

PORTFOLIO COMMENTARY

The Nedgroup Investments Growth MultiFund rose by 4.1% during June.

Within equities, the best performing active funds were TT Emerging Markets Equity (+7.2%) and Dodge and Cox Global Stock (+5.7%), helped by their emerging market exposure. At the other end of the spectrum, were the more defensively positioned funds – Nedgroup Global Equity (+4.9%), Morgan Stanley Global Brands (+4.9%), and Fundsmith Equity (+4.4%). Whilst Allianz Global Small Cap (+4.2%) lagged, as small cap stocks in general underperformed larger stocks during June.

In other asset classes, Nedgroup Global Property (+1.0%) underperformed broader equity markets, as REITs in general could not keep up with the more cyclical exposed areas. Our exposure to UK commercial property was mixed. BMO Commercial Property (-7.2%) continued to be weighed down by Brexit uncertainty and concern surrounding the health of the UK retail sector, whilst the less cyclical UK Care homes, Impact Healthcare (+2.0%) and Target Healthcare (-0.6%) diverged in June. Infrastructure holdings were extremely supportive, with John Laing Environmental Assets (+5.5%), 3i Infrastructure (+4.6%), Greencoat UK Wind (+4.5%), The Renewables Infrastructure Group (+2.0%) and Greencoat Renewables (+1.0%) all increasing over the month. The asset-backed finance investments, SQN Asset Finance Income Fund C-Shares (-2.7%) and GCP Asset Backed Income (+1.0%) were more mixed during the month.

In terms of changes to the portfolio, we decided to participate in a capital raise by GCP Asset Backed Income. We are pleased with the investment in GCP Asset Backed Income and believe that it will continue to provide investors with a high level of reliable income, some

NEDGROUP INVESTMENTS GROWTH MULTIFUND

degree of inflation protection and a low risk of any permanent or material loss of capital. We also made a modest reduction in our equity exposure, after the strong rally seen in June we decided to rebalance back to target levels. We implemented this move in equities through reductions in Allianz Global Small Cap and Fundsmith Equity into cash.

Note: All returns are quoted in US dollars.
